

# IDENTITIES MANAGEMENT

## Authority Control

Backstage will standardize MARC/Cataloging formatting as well as Authorize existing Bibliographic Headings. We use proprietary software for updating obsolete MARC and matching Bibliographic headings against National authority files such as LCNAF/SAF, MeSH, FAST, AAT, etc.

Record Selection

Identify records you want submitted for Authority Control.

Profile Customization

Customize your settings for Authority Control & RDA Enrichment. Also suggest custom changes to meet your individual needs.

Record Cleanup

MARS 2.0 performs a myriad of cleanup rules to bring records up to current MARC standard.

RDA Enrichment

MARS 2.0 can enrich AACR2 records with RDA elements as well as validate existing RDA records.

Heading Matching

MARS 2.0 will attempt to match/verify/update existing bibliographic headings against your selected authority files. We can incorporate Local authorities, too!

Other Enrichment

Select optional URI Enrichment or Reading Levels to finish off your records.

Results

We'll return your updated Bibs, all corresponding Authority records, and all desired reports.
